

The glory.

VMP Studio 4.0:
Now with video clip support.

The power.

VMP Studio™ 4.0: Advanced CG with paint system, image store, real-time motion effects, and event sequencer.

Get ready for the newest generation of Inscriber's powerful NT-based character generator software, VMP Studio 4.0. Featuring modular artistic and media management tools, VMP Studio enables artists to create and display glorious television graphics in a hurry.

Not only does VMP Studio integrate with your entire computer network for easy file sharing and compatibility, the product gives you leading edge productivity tools including advanced CG creation features, a motion effects editor, an alpha-aware paint system, an integrated image and clip store, a dynamic event sequencer, and a time-saving template utility.

VMP Studio uses industry-leading framebuffers to output superb key and fill signals with a field-based animation layer for the highest possible image quality. Add to this the ability to work in everything including composite, component, and serial digital in either 4:3 or 16:9 NTSC, PAL, and HDTV resolutions, and you can see why Inscriber character generators are used in over 30,000 video facilities around the world.

After all, if you want graphics that really grab your audience, you need a graphics platform with unlimited power. VMP Studio 4.0.
